

Many builders say they are “green”, but what do they really mean? We say, “Prove it!”

Imagine Homes is the first builder in San Antonio to certify every home we build under two prestigious programs, the Build San Antonio Green program and the EPA Energy Star Home program by U.S. Department of Energy. Our commitment to high performance green building is validated amongst our peers through winning five National Association of Home Builders Green Building Awards, two national Energy Value Housing Awards and two City of San Antonio Green Building Award, but the real winners are our homeowners.

- Energy saving features save up to **50%** or more energy to reduce your monthly utility bill
- Water saving features conserve over 40,000 gallons per year saving you money every month
- Every home is performance tested to insure it performs the way it was designed
- Increased comfort
- Enhanced indoor air quality
- Electric, gas and water prices are only going to increase!

Your kids will thank you, the community will thank you and now you can go to sleep knowing you live in one of the best homes on the planet! We encourage you to compare our high performance green building system to other builders who say they are “green”. The list on the back will help you compare how they stack up.
