

Builders Challenge

Recognizing Energy Leadership in Homebuilding

February 1, 2009

Imagine Homes
Mr. John Friesenhahn
11467 Huebner Rd. Suite 225
San Antonio, TX 78230

Dear Mr. John Friesenhahn,

Congratulations on meeting the U.S. Department of Energy's Builders Challenge! Homes that meet the Challenge are not only among the most energy efficient homes on the market, but the rigorous Builders Challenge Quality Criteria also ensures the highest comfort, quality, health and safety for your customers.

You are among the first to take the challenge posed by DOE to build 220,000 high performance homes by 2012. We thank you and we urge you to continue on this journey with us to ensure that by 2030, any American can purchase a Net-Zero Energy Home.

Please take advantage of your differentiation from other homes in the market by utilizing your customized EnergySmart Home Scale as well as the marketing tools and other resources available for download at www.buildingamerica.gov/challenge.

Thank you again for making a difference and leading the way to a more energy independent America.

Sincerely,

A handwritten signature in blue ink, appearing to read "Edward Pollock".
