

# A lot of builders say they are “green”, but what do they mean? We say, “Prove it!”

Imagine Homes is the first and only builder in San Antonio to certify every home we build under two prestigious programs, the Build San Antonio Green program and the EPA Energy Star Home program by U.S. Department of Energy. Our commitment to green building is proven by being named the Single—Family Production Home of the Year by the National Association Green Building Awards.

- Energy saving features save 25% to 35% more energy to reduce your monthly utility bill
- Water saving features conserve over 40,000 gallons per year saving you money every month
- Every home is performance tested to insure it performs the way it was designed
- Increased comfort
- Enhanced indoor air quality
- Electric, gas and water prices are only going to increase!

Your kids will thank you, the community will thank you and now you can go to sleep knowing you live in one of the best homes on the planet! We encourage you to compare our green building methods to other builders who say they are “green”. The list on the back will help you compare how they stack up.

**ImagineHomes**

Possibly the best homes on the planet.
