

AND THE WINNER IS...

Imagine Homes has been selected as
The Single-Family Production Home of the Year in the 2008
National Association of Homebuilders Green Building Awards.

Imagine Homes would like to thank Honeywell MERV 8 filtration systems, advanced framing techniques, blown-in cellulose insulation, LP® Techshield® Radiant Barriers, Carrier® high-efficiency HVAC systems, Caroma® dual flush toilets, water-saving low-flow plumbing fixtures, MANABLOC water manifolds, native drought tolerant landscaping, Noritz® tankless water heaters, non-ozone depleting AC units plus duct-blaster and blower-door testing for playing a vital role in making every home we build to be environmentally responsible and affordable. Without you, we'd be like every other home builder on Earth. We thank you. San Antonio thanks you. The planet thanks you.

ImagineHomes
Possibly the best homes on the planet.
